Progress Report #4

During the last sprint I messed up big time and built my website in HTML and not PHP. I am now trying to convert my website to PHP. I WILL PERSERVERE! All logo and wire-framing is done. I secured the permission to use the guided meditations from UCB. I created a working MySQL database that is linked to my PHP website.

What has already been completed as of 11/29

- Attained permission to use audio from UCB
- Created final logo
- Created a wireframe layout
- Validated Project
- Created web layout using HTML/CSS
- Created Database in MySQL for Google map locations

Future Plans

This week I will finish coding my webpage in PHP. I will also be adding the media that I secured the right to use. After I am done coding my webpage I will be sending it to an SME and also will be conducting usability testing on it. I will also be updating my portfolio Github website and preparing for the final jury.

Concerns/Reflections

I have made a huge error. I had thought that the website was supposed to be coded in HTML. I now know that I need to pay more attention to details. I am concerned that I will not be able to finish my animation in time. The animation is not the most important part of the website, but I did have it on my backlog so I will try to complete it. The final jury is approaching and I am very nervous.

Sprint ending 11/29/2015

ID	Pri	Task	Type	Est.	Actual.	Complete
1c	2	Digitize Logo	Design	120	110	yes
2c	1	Code web layout	Design	180+++	120	no
4a	6	Secure Media for Use on Website	Research	60	45	yes
3c	5	Create Map Application	design/code	180	120	yes
4c	4	Create animation for website	design/code	180	0	no
6b	3	Digitize Mindfulness Worksheets	design/code	180	120	no

Sprint beginning 11/29/2015

ID	Pri	Task	Type	Est	Actual.
8a	5	Usability testing	Research	60	
9a	6	Gather feedback from SMEs	Design	120	
10a	2	add media to site	PHP	120	
11a	5	add database to site	PHP/MySQL	60	
12a	1	CODE PHP	PHP	180	
6a	3	Digitize CBT and DBT worksheets	PHP	180	
13a	4	prepare for final jury	Research	120	
14a	7	update portfolio site	GitHub	180
